TIDEL
S⁵
Note Recycler

TIDEL
Quality Cash Solutions

Integrated Note Recycling

The Tidel S5 offers automated note deposit and recycling capability for high cash volume businesses. The Tidel S5 can recycle up to four denominations of notes in a fully integrated system. With a processing speed of 8 notes per second, the Tidel S5 offers the performance required to automate a high volume, transaction-heavy cash room environment. The Tidel S5 eliminates the need to have multiple store employees counting, sorting, and reconciling cash note deposits throughout the day.

Quick and Efficient Till Processing

With the Tidel S5, starting or ending a shift is a quick and completely automated process. To start a shift, the cashier simply logs into to the Tidel S5 via the optional fingerprint reader or user PIN, and then scans the till via the optional integrated scanner. The Tidel S5 will dispense the cashier's starting till. At the end of the shift, the authentication process is repeated and the Tidel S5 accepts the cashier's end of day till. Both processes take less than a minute to complete for a typical till.

Comprehensive Software Suite

The Tidel S5 software suite is expansive, easy to use, and completely adaptable to any user environment. The Tidel S5 software simplifies the process of managing users, assigning permissions, running reports, and managing cash note balances. The Tidel S5 offers a status bar that provides a dashboard-like status of all system components, allowing for proactive engagement when needed. The Tidel S5 also enables remote access capability, so authorized parties can perform necessary maintenance, or assist with troubleshooting, if required.

Secure Access

The Tidel S5 provides secure user authentication via the optional fingerprint reader or user PIN. Tills can be scanned prior to the start and end of each shift, using the optional integrated scanner. Access controls and permissions are easily configurable via the software. The Tidel S5 vault is equipped with a programmable combination-style lock to allow access to the vault in the event of a power loss.

The Tidel S5 is a fully integrated note recycler that is designed to automate the note usage function of big box retail stores, warehouse clubs, grocery stores, hotels, casinos, and other institutions that handle large volumes of notes on a daily basis.

Hardware Features

- ▶ Integrated Till Check In/Out Scanner (optional)
- ▶ Integrated Fingerprint Reader (optional)
- ▶ Uninterruptible Power Supply
- ▶ Integrated Printer
- ▶ Lockable Deposit Cassette(s)
- ▶ Continual 24/7 System Monitoring
- ▶ "Fitness Sort" on Recycled Notes
- ▶ Combination Style Door Lock in the event of power loss

Notes

- ▶ Recycles up to 4 denominations of notes
- ▶ Note Deposit Speed – 8 notes per second
- ▶ Note Deposit and Recycle Capacity[1]
  - ▶ 1 deposit cassette – up to 2,700 note capacity
  - ▶ 4 recycle cassettes – up to 2,700 notes per cassette
  - ▶ 1 reject cassette – up to 250 note capacity

[1] Note count may vary depending on age and quality of notes. Typical real world expectation: 2,200 ± 180 notes per deposit or recycle cassette.

Software Features

- ▶ Real Time Note Level Monitoring
- ▶ Expansive Reporting Capability
- ▶ User Permission Controls
- ▶ Multiple System Authorization – Login & PIN or optional Fingerprint Reader
- ▶ Multiple Tills per Register/Lane
- ▶ Guided Deposit Pick Up
- ▶ Automatically Re-Mixes Solution when Note Cassette Runs Empty
- ▶ Cassette Configurations (Deposit vs. Recycle) changeable via the Software
- ▶ Courier-Specific Login Menu Feature
- ▶ Integrated Status Bar for Proactive Issue Resolution
- ▶ Remote Monitoring Capability for Tech Support
- ▶ Auto-Prompt for Changing Passwords
- ▶ Video Troubleshooting Tips
- ▶ Video Guidance for System Operation

Specifications

Weight: 850 lbs. (386 kg)

Height: 48.88" (1242 mm)

Width: 19" (483 mm)

Depth: 36.19" (919 mm)

Power Requirements

120 VAC 60Hz or 220 VAC 50Hz
